VII: Resident Days

1. Number of Licensed Beds:** List the total number of beds licensed by ADPH during the reporting period. *Note: If the number of licensed beds either increased or decreased during the reporting period, indicate the number of licensed beds and the number of days during the reporting period for each licensed capacity. Example: If the facility was licensed for 14 beds for 120 days and 16 beds for the remaining 245 days of the reporting period, line 1 would show $14 \times 120 + 16 \times 245$. The calculation of this line would then be reported on line 2.*

2. Multiply the number of licensed beds listed above by 365 (the number of days in the reporting year) to determine the total number of available days.

3. Total number of unoccupied days: List the total number of days in which beds were unoccupied due to vacancies, deaths and discharges. Also, include 365 days for *every bed* licensed by ADPH but not set up and staffed during the reporting period.

4. Total Resident Days: Subtract the total number of unoccupied days (line 3) from the total number of available days (line 2) to determine the total number of resident days for the facility during the reporting period.

Please note: These amounts do not need to be audited prior to reporting.

Payroll: Total expenses for the reporting period spent on payroll for employees of the facility, including benefits.

To determine the daily rate, divide the monthly rate by 30.
